

Pro Labs

Phlebotomy Training 2023 Syllabus

Instructor's Name: Candis Cunningham

Phone Number: (832) 720-4024

Email: Candisc@prolabs.club

Course Description:

This course is designed to prepare students for future employment or a college degree in the biological laboratory sciences including microbiology, biotechnology, environmental science, food production science, and medical laboratory. The main focus of the program is to provide students with employable skills for working in these industries with the background knowledge to understand the science behind these techniques.

- **What to expect during these next 3 days:** Phlebotomy & Laboratory Science is designed to provide basic training in the areas of phlebotomy (drawing blood), medical terminology, First Aid/CPR and general laboratory procedures. Students will learn basic skills for use in a variety of positions working in medical or veterinary laboratories. With the skills and knowledge gained in this course, students are ready for direct employment in several fast-growing, entry-level careers as a phlebotomist, specimen processor, or sterile processing technician. **Pro Labs** students will complete phlebotomy training (drawing blood) to prepare for certification. They will gain additional knowledge and skills focused in the areas of biotechnology and microbiology. Students are able to apply this learning to support scientific research and product development relevant to a variety of industries- pharmaceuticals, medical, cosmetics, environmental and food/agricultural. This course significantly increases career pathways due to the applicability of the learning to multiple scientific fields. Students can go directly to employment in several fast-growing, in-demand careers as a phlebotomist, laboratory assistant, lab service employee or chemical technician and are well prepared to go to college for additional training.

PHLEBOTOMY APPLICATION FOR ADMISSION
